**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a method of obtaining an electrical signal from a patient, classified in class 600 subclass 547.
- II. Claim 16, drawn to a computer program product for implementing within a system a method for utilizing electrical feedback, classified in class 600, subclass 547.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are distinct. Neither invention requires the other for its practice and both have independent utility. As such, it is the Examiner's position that inventions are distinct and subject to restriction. In the instant case the distinct inventions disclose different methods of implementation.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3736

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
